

Adroit 360 Application Portal

1. Authentication & Onboarding (Sign Up / Sign In)

- **Splash Animation:** Displays the Adroit 360 logo briefly upon initial load before transitioning smoothly to the authentication card.
- **UI Theme:** Clean, minimal white background.
- **Required Input Fields:**
 - Full Name
 - Email Address
 - Phone Number

2. Admin Dashboard & Workflow

2.1 Navigation & Categories

The main dashboard categorizes incoming submissions into three primary sections:

- **NSS Applications**
- **Internship Applications**
- **Job Applications**

Selecting a category expands a sub-category dropdown menu.

Example Sub-categories:

- Software Developers
- UI/UX Designers
- Mobile App Developers

2.2 Applicant Selection & Detail View

Selecting a sub-category loads the relevant list of applicants:

- **List View:** Applicant names are displayed prominently for quick scanning.
- **Detail Panel / Profile View:** Clicking an applicant's name opens their detailed profile featuring:
 - Full Name
 - Email Address
 - Personal Statement of Motivation
 - Uploaded CV / Resume

- Applicant Photo (*Optional*)

2.3 Application Review & Action Rules

At the bottom of the detailed applicant profile, two primary actions are available: **Accept** and **Decline**.

A. Decline Workflow

1. Clicking **Decline** triggers a confirmation modal.
2. The modal includes an optional text field allowing the admin to add specific feedback or additional notes.
3. Upon confirmation, an automated email response containing the rejection status (and any added notes) is sent to the applicant's personal email address.

B. Accept Workflow

1. Clicking **Accept** moves the application entry directly into the "**Accepted Applications**" section under that specific sub-category.
2. Automatically triggers an acceptance confirmation email to the applicant.

3. Applicant Interface Workflow

The Applicant Interface shares a cohesive design language with the Admin Portal while streamlining the submission process:

1. **Role Selection:** The applicant chooses their target category (e.g., *Internship Application*) and specific role (e.g., *UI/UX Designer*).
2. **Application Form:** Selecting a role directs the user to a dedicated form containing the following input fields:
 - Full Name
 - Email Address Phone Number
 - Personal Statement of Motivation
 - CV / Resume Upload
 - Profile Photo Upload
3. **Submission:** Submitting the form generates a confirmation prompt and pushes the candidate's record directly to the corresponding Admin Dashboard sub-category.
